

Hastin Chen

(510) 820-4902 | hast@ucla.edu | in/hastinchen | github.com/fyrebolt | Los Angeles, CA

EDUCATION

University of California, Los Angeles (UCLA)

Expected Jun 2028

Bachelor of Sciences, Computer Science and Engineering, GPA: 3.65, 3x AIME Qualifier

Los Angeles, CA

Coursework: Intro to Computer Science I/II, Data Structures, Algorithms, Calculus II, Linear Algebra, Differential Equations, Discrete Mathematics, Software Construction, Computer Organization, Programming Languages, Logic Design of Digital Systems

Involvements: Delta Sigma Phi Fraternity, Association of Chinese Americans, Association of Computing Machinery-Cloud Consulting, Bruin Software Engineers, Claude Builder Club, Creative Labs, Computational Biologists' Society, DataRes (DataBlog)

EXPERIENCE

Software Engineer Intern

Jun 2026 – Present

Roblox - Economy ML

San Mateo, CA

- Designed recommendation pipeline that generates multiple personalized item collections from shared pool in one ranking flow
- Built modular retrieval / grouping abstractions for behavior-, attribute-, concept-based personalization with ANN expansion
- Extended ranking platform with composable generators and strategy interfaces for experimentation / new recommendations

Lead Software Developer

Mar 2026 – Present

Private Equity Stealth Startup

Los Angeles, CA / Hybrid

- Led 3 frontend engineers building LLM-powered Excel-native underwriting platform for real-estate and credit-finance teams
- Built a LangGraph / Gemini pipeline that auto-extracts a workbook's inputs, macros, and outputs into versioned profiles
- Engineered a secure cloud-to-desktop layer (FastAPI + xlwings) running real Excel macros via short-lived lease tokens

Technical Product Manager / Lead Frontend Developer

Mar 2026 – Jun 2026

Creative Labs - Fitty

Los Angeles, CA

- Translated over 100+ team SVG designs and sketches into reusable Swift UI components and the app's core navigation flows
- Aligned designers / engineers on product spec and to individual contributions, holding the iOS build to one-quarter timeline

PROJECTS

Build It Break It 2026 — Sniper | *Next.js, TypeScript, Tailwind, Hono, Supabase, Vercel*

[GitHub](#)

- Interviewed SWE recruiters to identify hiring gap, built DevPost hackathon project scraper that finds top builders to fill it
- Tested the app for vulnerabilities, leaks, and exploits, then deployed on Vercel, winning Best in Security

Local Politics Scraper — unbAIs | *Python, Flask, PostgreSQL, SQLite, React, Tailwind, Claude*

[GitHub](#)

- Built a web civic-transparency tool that decodes city-council transcripts into an interactive voting-record network graph
- Engineered a Python / Flask pipeline that scrapes transcripts into SQLite and clusters councilmembers into voting factions

Deepmind Hackathon — Gio | *React, Flask, OAuth, PiP, Lyria, Gemini Live, MCP, SQLite*

[GitHub](#)

- Built an always-on AI DJ and voice assistant pairing Gemini Lyria music generation with a Gemini Live conversational agent
- Engineered real-time audio orchestration that ducks the generated music during speech and resumes it after each exchange
- Made the music context-aware, auto-tuning to the user's task, with live control from a UX-focused Picture-in-Picture popup

LEADERSHIP & ACTIVITIES

Sponsorship Director | *UCLA Association of Chinese Americans*

May 2026 – Present

- Secured \$10k+ in sponsorships across 8 local businesses, while still contacting 100+ shops in Westwood, Sawtelle, Koreatown
- Developed new digital wallet system (iOS and Android), improving member convenience and doubling sponsor retainment
- Managing corporate relations for UCLA's largest club (with 800+ active members), attending to member and sponsor needs

Founder & Captain | *Granada Hackathon Team*

Apr 2023 – Apr 2025

- Captained teams of 4-6 winning \$4,000+ at Hyphen, Pioneer, and Los Altos Hacks (nation's largest high school hackathon)
- Managed task delegation, version control implementation, and weekly prep sessions, increasing team productivity by 25%
- Coordinated communication and presentation strategy, including structured product pitches tailored to judges and sponsors

TECHNICAL SKILLS

Languages: Python, Swift, JavaScript, TypeScript, C#, SQL/NoSQL, Java, C++, HTML/CSS

Frameworks/Libraries: React, Next.js, Node.js, Hono, FastAPI, Flask, Tailwind, LangChang/LangGraph

ML/AI: TensorFlow, PyTorch, Prompt Engineering, Vector Databases, OpenCV, ML5, LLM Agents, Airflow, Kubeflow, Superset, Spark / PySpark

Infrastructure/Tools: Git, Claude Code, Cursor, Codex, Antigravity, Vercel, AWS, Grafana, Postman, GitHub Actions
